Texts & Broadcasts

The platform utilizes your phone's native texting services to send out texts to individuals, specific groups, or everyone at once.

This allows you to update everyone on your team, in your client base, and on your prospect list simultaneously - saving you time and sanity.

I NEED TO SHOW EVERYONE

BZcard™

Make your networking contactless with a digital business card that shares your business information, work portfolio, customer testimonials, contact information, and so much more!

Consider the BZcard™ your own mini-website that can easily be sent via text or broadcast.

This tool allows you to upload photos, videos, and text content that can inform a viewer about anything you can imagine. Our team has used these as event invitations, new product releases, sales lead captures, training pages, and (sometimes for what they were designed) digital business cards.
